The number of indictable offences cleared up in the year 1955 was 7,005, details of which are contained in Columns 3 and 17, Appendix A (1) and Column 2, Appendix G (2), giving a detection percentage of almost 61% in relation to the number of indictable offences recorded for the year.

In the year 1954, the detection percentage was 60.

The incidence of indictable offences and detections in the years 1945 to 1955, is shown in Graphical Form in Appendix A (3).

Convictions were recorded in 49 cases and in a further 16 cases, the charges were held proved and the Probation of Offenders Act was applied. Seven cases are shown pending.

Convictions were recorded in 59 cases and in 179 cases, the charges were held proved and the Probation Act was applied. 41 cases are shown still pending.

Details are given in Appendix G (1).

Comparative Numbers of Indictable Offences in Years 1938 and 1955.

A comparison of the number of indictable offences recorded in the year 1955 with the number for the year 1938 will be of interest.

The number recorded in 1955, viz., 11,531, was almost double the number—6,769—recorded in 1938. The peak year in the intervening period was 1943, when the number was 17,305. There followed a gradual yearly decrease until 1949 when the number was 12,171 and the figures again rose gradually to 15,602 in the year 1953, falling again to 11,531 in 1955.

The principal increases from 1938 to 1955 are under the headings of Offences against Property. During the war years, 1939–1945, and for some time later the scarcity of commodities, high prices and rationing restrictions opened up new channels for the disposal of stolen property and no questions were asked by purchasers generally as to the source of supply. The effects of those years still remain. In addition, the rapid development of road transport has assisted the travelling criminal and the progressive fall in the strength of Gárda in post emergency years has contributed to the general picture.

Comparative figures of indictable offences for the years 1938 and 1955, with the areas of incidence and the offences in which the main increases appear, are given in the following table:—

The number of juveniles cautioned in 1955 was 508.

CIRCUMSTANCES CONTRIBUTING TO DELINQUENCY.

The main causes of circumstances which, in the opinion of the Gárda, contributed to juvenile delinquency in the year 1955, were (1) Lack of Parental Control—807 cases or 38%; (2) Desire to get Money for Amusement—596 cases or 28%; (3) Mischief—322 cases or 15%; (4) Youthful Gang Influence— 293 cases or 14%; Criminal Associations—97 or 5% and Necessity—23 cases or 1%.

Comparative figures for the years 1950 to 1955 are given in the following table:—

Percentage of Juvenile Offenders Charged in Relation to Total Persons Charged with Indictable Offences,

The number of juveniles (2,138) dealt with in the Courts in year 1955 formed over 36% of the total persons charged with indictable offences. In year 1954, the percentage was 34 and in year 1953, it was 35%. The number of juvenile offenders and the approximate percentage of the total persons charged with indictable offences in the years 1950 to 1955 are given in the following table:—

YEAR	No. of Juvenile Offenders dealt with for Indictable Offences	Percentage of Total Number of Persons Charges with Indictable Offences.
1955	2,138	36%
1954	2,057	34%
1953	2,474	35%
1952	2,341	34%
1951	2,702	34 % 36 %
1950	2,453	36%

The high percentages of juveniles charged in relation to other offenders is attributable to the fact that proceedings are invariably taken in offences committed by juveniles, as it is much easier to obtain evidence against them than against adults. The offences are, generally, committed in their home locality, their comrades will implicate them and the juveniles themselves will admit their guilt when questioned by the Gárda in the presence of their parents or guardians, as is the rule for the Gárda. The offences of juveniles, too, are mostly of a minor nature. The property stolen consists mainly of petty cash, toys, sweets, torch lights, fountain pens, games, etc., and because of a share out with their friends, often provide a clue to the offenders.

The number of juveniles dealt with, therefore, could reasonably be said to represent the total of juvenile offenders in the country.

On the other hand, the adult or seasoned offender plans his offences with care, works alone and is careful as to the disposal of stolen property. He will not admit his guilt readily and may do so only on being confronted with evidence to convict him. A number of such offenders escape prosecution for lack of evidence, though known to the Police as offenders.

On the termination of proceedings against a juvenile, a special form is completed by the investigation Police Officers, giving particulars for each offender from which statistics are compiled, The statistical features of juvenile crime shown in this annual report, may, therefore, be accepted as reliable.

OFFENCES CHARGED AGAINST JUVENILES.

PART IV.

SCIENTIFIC AIDS TO CRIME DETECTION.

A special Section of Crime Branch Headquarters—known as The Technical Bureau—provides valuable assistance by means of scientific aids to Gárdaí throughout the country in the investigation of crime.

The Section is provided with up-to-date equipment,

The staff is appointed from experienced members of the Force who have had technical training. Lectures with practical demonstrations in modern methods of criminal investigation are given to members of Detective Branch, uniformed members in the more populous centres and also to recruits in training.

At the request of the Army Authorities, lectures are given also to parties of Military Police Probationers.

The Section is divided into six Sub-Sections, namely :-

(1) Investigation.

(4) Mapping.

(2) Fingerprints and Criminal Records.

Ballistics.
 Radio.

(3) Photography.

The following is a brief resumé of the work performed by the individual Sub-Sections during the year.

(1) Investigation.

The services of this unit are sought by Officers throughout the country in the investigation of serious crimes. The unit also acts as a useful link between the Commissioner and Local Officers at all stages of the investigation and co-relates enquiries extending over various Gárda Districts.

The employment of extern experts such as the State Pathologist, State Analyst, Handwriting and Textile experts, is arranged for by this unit.

The preliminary examination of handwriting exhibits, articles of clothing bearing stains, etc., resulted in the elimination of many of these and a consequent saving of expense which would arise through examination by extern experts. There were 179 handwriting exhibits received and 141 of these were eliminated.

There were 213 other exhibits received of which 97 were eliminated.

(2) Fingerprints and Criminal Records.

In this Sub-Section a complete record is kept of the previous convictions of each criminal, including a description, photograph, history of subject, and the modus operandi employed. The total number of criminal records now filed is 79,817 representing an increase of 2,175 on the 1954 figures.

Fingerprints which are found at the scenes of crimes are classified and compared with prints already recorded. The comparison may lead to the identity of the criminal, but when no identification is made (as in the case of new entrants to crime), the prints found are preserved for future reference. When a new criminal is arrested, it is thus often possible to connect him with outstanding crimes.

Enquiries are daily received from and sent to other police forces, and interchange of fingerprints and records is made in the case of travelling criminals.

Regular issues of Fogra Tora in two parts are prepared in this Sub-Section.

Part 1 deals with persons wanted for crime, missing persons, and descriptions of property stolen or recovered.

Part 2 contains photographs of convicted persons, with their descriptions, which are filed at Stations for reference.

Photographs are supplied in convenient pocket-book form to detectives and stations in cities.

The following is a summary of the work performed in this Sub-Section during the year:—

(3) Photography.

This sub-section deals with the various phases of Police photography:— (a) Photographs of criminals for circulation.

light for forgeries, etc.

- (b) Scenes of traffic accidents and crimes.
- (c) Dead bodies at scenes and at morgues for identification.
 (d) Documents, forgeries and suspect handwriting, restoring obliterated writing, examination with ultra violet
- (e) Photography of finger prints and enlargements for Court purposes.
- (f) Photostatic copies of maps and other documents.
- (g) Micro-photography of marks on bullets, tool marks on iron and woodwork for comparison purposes.

Members of this sub-section visited the scenes of 246 crimes or traffic accidents and attended Courts on 82 days during the year. 9,045 photographs and 1,060 photostatic copies were prepared, showing an increase of 1,377 photographs and 500 photostatic copies over the year 1954.

120 projection slides were prepared for projection in cinemas throughout the country and Northern Ireland seeking the assistance of the public in the investigation of a case of child stealing.

Photographic work and examinations were undertaken for the Post Office investigation staff, the Post Office Stores, the Army, the Land Commission, the Central Bank and the Handwriting Expert.

(4) Mapping.

The scenes of 165 crimes or traffic accidents were visited by the mapping staff, 787 maps prepared and 119 Courts attended during the year.

Maps and charts for official use by various branches of the Force were also prepared,

(5) Ballistics.

The duties performed by the members of this sub-section include examination and comparison of guns, bullets, cartridge cases, glass fragments found at the scenes of road accidents or on the clothing of suspects, cutting instruments and marks on woodwork, etc., at scenes of crimes, restoring of erased numbers on motor vehicle engines and chassis and on pedal cycles.

The following items were examined during the year—39 firearms, 204 bullets, cartridge cases, etc., 13 cycles, and 1,140 miscellaneous articles. The latter category includes glass fragments from "hit and run" accidents, safes, housebreaking implements, footprints, clothing, pieces of metal, etc.

The scenes of 20 crimes were visited and 48 courts attended.

(6) RADIO.

A central transmission and receiving station working on V.H.F. is established at Headquarters and operated by remote control from Dublin Castle, where the maintenance staff is attached.

The range covers some 30 miles depending on contours of country.

In Dublin, Rathfarnham and Howth there are 19 cars fitted with two-way radio telephone; 7 two-way sets and 12 receiving sets are also installed in Gárda Stations in Dublin and adjoining counties,

Walkie-talkie radio sets are also issued to foot patrols for the control of crowds at public meetings, sports fixtures, etc.

Radio equipped cars are continuously patrolling in Dublin city and suburbs, and during variable hours in adjoining counties, and form a link with foot and cycle patrols. These cars are in constant touch with Headquarters and with one another.

Details of crimes, road accidents and street disturbances are broadcast and cars are directed to scenes to cut off the escape of fleeing criminals. These messages are also received at Gárda Stations on the perimeter of the city, and patrols from these Stations are notified when necessary.

Radio communications are linked up to relay complaints received from the public over the "999" telephone system regarding crime, suspicious loiterers, etc., thus enabling speedy attention to be given to complaints, by the Gárda. Several arrests on the spot have been made within a few minutes of the receipt of complaints, and vehicles which have been involved in hit and run accidents have also been intercepted.

A number of business houses in Dublin have installed automatic "burglar-alarms", which are connected to Detective Branch, Dublin Castle. Alarms received are broadcast at once to radio cars.

During the year 1955, there were 10,962 " 999" calls received resulting in the arrests of 573 offenders.

Patrols in the Dublin area were responsible for making 1,266 offenders amenable in the following cases:—271 Housebreakings and/or Larcenies, 24 Theft of motor vehicles, 362 cases of Street Disorders—Assaults, etc., and 609 other offences.

The following are brief details of some cases in which the successful use was made of radio patrol cars during the year:—

(a) On 31/5/1955 at 8.30 p.m. while patrol car was on duty at East Wall Road two youths were observed riding a motor cycle which had already been reported per

- "999" call as stolen. The youths dropped the machine and ran, but after a chase they were arrested by the crew of the patrol car.
- (b) On 20/6/1955 at 3.25 p.m. a handbag was snatched from a woman at Fortfield Road, Terenure, Dublin. A description of the suspects was broadcast and following a search of the locality two youths were arrested and charged with the offence.
- (c) At 7 a.m. on 8/7/1955 one of the radio cars received a message to go to an address at Lower Baggot Street, Dublin, where a man was believed to be illegally on the premises. On arrival the crew of the car found a man on the premises who was arrested and subsequently charged and convicted of Housebreaking.
- (d) On 14/6/1955 in response to a "999" call one of the patrol cars attended at Marlboro' Street, Dublin, where an area was cordoned off and 4 youths arrested who had feloniously entered premises there.
- (e) At 11.10 p.m. on 21/3/1955 the crew of a patrol car observed a stolen motor car at North Brunswick Street, Dublin. The patrol car gave chase and succeeded in arresting the three occupants who were charged with the offence.
- (f) At 8.30 p.m. on 18/12/1955, a call was received to say that a member of the Gárda attached to Malahide Station, County Dublin, had been knocked down by a motor lorry which had failed to stop. A search of the area succeeded in locating the culprit who was later charged with the offence.
- (g) On 12/6/1955 a call was received to the effect that a motor car was being driven in a dangerous manner at 1.45 a.m. at Cooley Road, Drimnagh, Dublin the driver responsible was traced and charged.
- (h) At 8,45 p.m. on 12/11/1955, a radio message was received to say that there was disorder at Harcourt Street, Dublin. On arrival the crew of the patrol car arrested a woman who was later charged with and convicted of being drunk and disorderly on the occasion.

I have the honour to be, Sir, Your Obedient Servant,

D. COSTIGAN, Commissioner.
